## Telecom Company

### ISSUE TELECOM ANTENNA LOCATION

Choosing the location of a new antenna, for a telecom compagny, is a matter as much essential as it is complex. Numerous factors need to be considering ; the traffic ; the population density ; the future user's needs.

### GEODATINDUSTRY PROPOSAL

In the Geodatindustry's Database, a telecom company would be able to find accurate data to know the best place possible to install a new antenna. We geolocate shops and firms all over the world, as well as places like shopping malls and main streets which attract thousands of visitors each week. This kind of data is the ideal support for this decision making process.

### TELECOM COMPANY CLIENT

SFR is a French telecom company and a client of Geodatindustry.
