

# Case Study Energy Supplier

## CASE STUDY N°3

### Energy Supplier

#### ISSUE PHOTOVOLTAIC PANEL INSTALLATION

A photovoltaic panel can not be installed just anywhere, it is a complex matter. It is important to know the weather pattern of the target area, and the dimensions, orientation and inclination of the roof. At last, it is interesting to know the companies field of work, and their energy needs.

#### GEODATINDUSTRY PROPOSAL

In the Geodatindustry's Database, an energy supplier company would find the physical addresses and x,y coordinates of their clients, as well as their field of work and their GLA (Gross Leasing Area). Geodatindustry is also a very flexible company and can therefore meet custom-made needs of any client by doing specific researches. In that case, Geodatindustry would gather information about companies' physical orientation, and roof details.

#### A BUILDING

#### DELIVERY SERVICE COMPANY CLIENT

EDF is a energy supplier French company and a client of Geodatindustry.
